Facilitating the Internationalization of Liberal Professionals Worldwide

APRI INTERNATIONAL

Introduction

Since 2023, APRI INTERNATIONAL, formerly known as Apri Europa, has embarked on a significant transformational journey to reflect its growing international commitment.

This change was driven by its mission to participate at Expo Dubai in 2021, Singapore in 2022, where APRI Europa hosted a seminar on “Opportunities and Advantages for Professionals and Businesses,” as well as key events in New York and Washington in 2023.

These efforts demonstrate the company’s dedication to providing support to professionals and international businesses.

Mission

APRI INTERNATIONAL is dedicated to supporting professionals and associations involved in internationalization policies.

The company plays a crucial role as a liaison between institutions, private entities in other countries, including (SIMEST, SACE) ICE and Assocamerestero, and Italian professionals eager to expand their knowledge and establish relationships with foreign entities.

Promoting International Exchange

To facilitate knowledge exchange and promote collaboration between Italian and foreign professions, APRI INTERNATIONAL analyzes the economies of all those countries with which professionals wish to interact.

Additionally, the company actively promotes relationships between CEPLIS and institutional representatives of professions in these countries.

Finally, APRI INTERNATIONAL organizes institutional value missions in each of the countries that, in turn, assume the presidency of the European Union.

Fostering Economic and Institutional Relations

APRI INTERNATIONAL actively promotes economic relations between Italy and the rest of the world, providing support to Italian professionals and businesses on their path to internationalization.

The company offers a full range of specialized services, including information, training, promotion, and consulting. These services help understand foreign business environments, identify new opportunities, enhance existing relationships, and create new synergies.

Apri International support the professionals to get in relation with Embassies and Consulates network

The background features a complex financial chart design. It includes a candlestick chart in the upper left, a line graph with circular markers in the upper right, and a bar chart with diagonal bars in the lower right. The overall aesthetic is clean and professional, using a light gray color palette.

Access to International Economic Data

Furthermore, APRI INTERNATIONAL offers a service providing access to research-based reports on all countries, including key macroeconomic indicators relevant to freelance professionals, as well as data on foreign trade involving the country under examination.
